The www.aias.us and www.upitec.org websites are produced by two to five regular authors, and a small support staff. They are unique in that they contain about three thousand five hundred freely accessible documents. The other institutional websites are produced by much larger staffs and do not contain much information apart from routine listings of staff and courses. We are effectively a small research group. Comparison with two other research groups shows that we out impact them greatly. This confirms the conclusions drawn from other comparative impact tables on www.aias.us . Based on rarely available hit counters and dates. Our websites are used for serious study by the best in the world.
